DESCRIPTION & NOTES...			

Now Available at Alto !!!! Chrysler Intermediate Shafts...

TRANSMISSIONS: A500/40RH, 42RH, 42RE, 44RE, A518/46RH, 46RE, A618/47RH, 47RE, Grand Cherokee, Durango, Pickup/D50, Pickup/Dakota, Pickup/Ram 2500-3500, Van/Wagon 100, 2500, 3500.

We are pleased to announce our complete replacement program for the intermediate shafts used in the rear wheel drive overdrive Daimler Chrysler transmissions. These original shafts along with the overdrive planet sets have a high failure rate.

Alto offers two styles of these very popular intermediate shafts.

1. OE Style, produced to the exact specifications of the original shaft.
2. Modified style, produced with larger lube feed holes to prevent "lack of lube failure to overdrive planet set.

***** THESE SHAFTS ARE NEW AND NOT REMANUFACTURED PRODUCTS *****
