	Pontiac – Bonneville / Catalina / Firebird / Grand Prix / Lemans / Parisienne / Phoenix / Ventura

OE Style Band

Alto PowerBand 18% wider

Drum must be smooth and flat

DURABILITY AND PERFORMANCE BENEFITS: Provides 18% more friction surface for torque load enhancement, and the ability to provide a more positive 2nd gear shift or 2-4 shift. All bands have high carbon heat-treated “thick” anchors to prevent tearing. These bands are available in the race proven RED EAGLE lining or the KEVLAR lining. This is a welcome addition for the lightest 3 - 4 speed OEM - GM automatic transmission.

Installation: Same installation procedures as the OE style band. Use the band apply pin-checking tool, and inch pound torque wrench to determine the correct length servo pin. The drum surface area must be smooth and flat where the band lining will make contact.

Shift... Your Thinking
