New Product Release Anti-Drag™ Steel Plates

Transmission:	Racing Aluminum Powerglide
Alto Part # :	019713UP1 Non-Kolene® Reverse Clutch Plates 019711KUP1 Kolene® High Clutch Plates

The “Anti-Drag™” plates eliminate the parasitic drag that takes place whenever a multiple disc clutch is disengaged. The rubber spacers are slightly thicker than the friction disc used in the clutch pack; this separates the steels from the friction disc. The concept has been used in the industry for many years. Alto takes it to the next level by using Viton rubber spacers in a pre-assembled plate.

Stack-up is same as OE. Alternating friction and steel plates position Anti-Drag™ plates so Viton spacers give each friction plate clearance.

Shift... Your Thinking
