Increase the amount of torque the overdrive clutch can handle with this kit.

NEW TO ALTO! Overdrive PowerPack® #026758...

The Problem:

Premature failure of the overdrive clutch due to high torque applications, when subjected to a hi-performance or heavy-duty environments. The overdrive clutch can fail under these conditions, including hot-spotting the steel plates, along with slide-bump shifts.

The Solution:

Alto Products Corp. is pleased to release a capacity kit for the overdrive section of the E40D / 4R100 transmissions. We have added one more friction and steel element to increase the capacity of the overdrive clutch, along with Red Eagle® friction lining, which will dramatically increase the amount of torque the overdrive clutch can handle.
