

## Nissan/Infiniti RE5R05A Input Clutch PowerPack®

Alto Kit # 174756

### CONTENTS OF THIS KIT INCLUDE:

8	174746-152	Red Eagle™ Frictions Plates (1.52mm / .060")
8	174701K170	Kolene Steel Separator Plates (1.70mm / .067")
1	174761	Top Pressure Plate (4.37mm / .172")
1	026251-094	Snap Ring (2.39mm / .094")

Alto received several requests from builders around the world to produce a PowerPack® that provides more capacity for the Input clutch of the RE5R05A transmission. Now you can replace the 6 friction elements with 7 friction elements and the 7 friction elements with 8 friction elements in the Input drum of this unit.

**Installation:** Stack the Input clutch pack as follows; start with a 1.70mm Kolene® steel plate, alternate installing friction and steel plates ending with a friction plate (7 or 8 Red Eagle® frictions / 7 or 8 Kolene steels). Install the 4.37mm pressure plate and snap ring.

Using a feeler gauge, measure the clearance between the snap ring and the pressure plate in three different locations

Clearance should be 1.15 – 1.65 mm (.045" to .065")
