

Nissan/Infiniti RE5R05A Direct Clutch PowerPack®

Alto Kit # 174757

CONTENTS OF THIS KIT INCLUDE:

8	174740-150	Red Eagle™ Frictions Plates (1.50mm / .059")
8	174711K150	Kolene Steel Separator Plates (1.50mm / .059")

Alto received several requests from builders around the world to produce a PowerPack® that provides more capacity for the Direct clutch of the RE5R05A transmission. Now you can replace the 5 friction elements with 7 friction elements and the 6 friction elements with 8 friction elements in the Direct clutch drum of this unit.

Installation: Stack the Direct clutch pack as follows; start with a 1.50mm Kolene® steel plate, alternate installing friction and steel plates ending with a friction plate (7 or 8 Red Eagle® frictions / 7 or 8 Kolene steels). Install the OE pressure plate and snap ring.

Using a feeler gauge, measure the clearance between the snap ring and the pressure plate in three different locations

Clearance should be 1.15 – 1.65 mm (.045" to .065")
