

Ford C4 Reverse High PowerPack® 64-On

ALTO PART # 025755A

Contents:

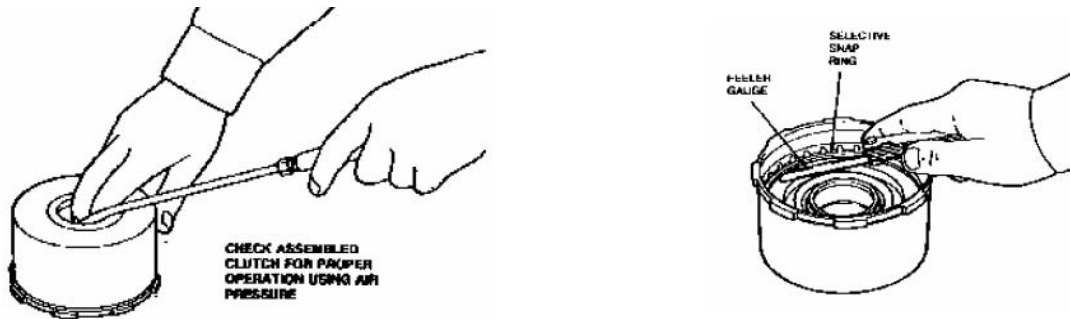

- (6) Friction Plates #025744-150 (.061/1.54mm) Red Eagle®
- (6) Steel Plates #025701H150PS (.060/1.52mm) Power Steel
- (1) Top Pressure Plate #025701-330 (.130/330) Steel

The stack-up of the reverse high clutch is the same as OE with the exception of adding additional plates. Starting with an externally splined steel plate and ending with an internally splined friction plate, and then the pressure plate and selective snap ring.

After assembly of drum, apply the clutch pack several times with air to seat all components, see Figure 2.

Figure 2

Check clutch pack clearance using a feeler gauge, insert feeler gauge between selective snap ring and pressure plate. Adjust clearance to .025" - .050" (0.6mm - 1.27mm).

Selective Snap Ring is available from Alto: 025256-052
