CaseSaver PowerPack

Description & Notes

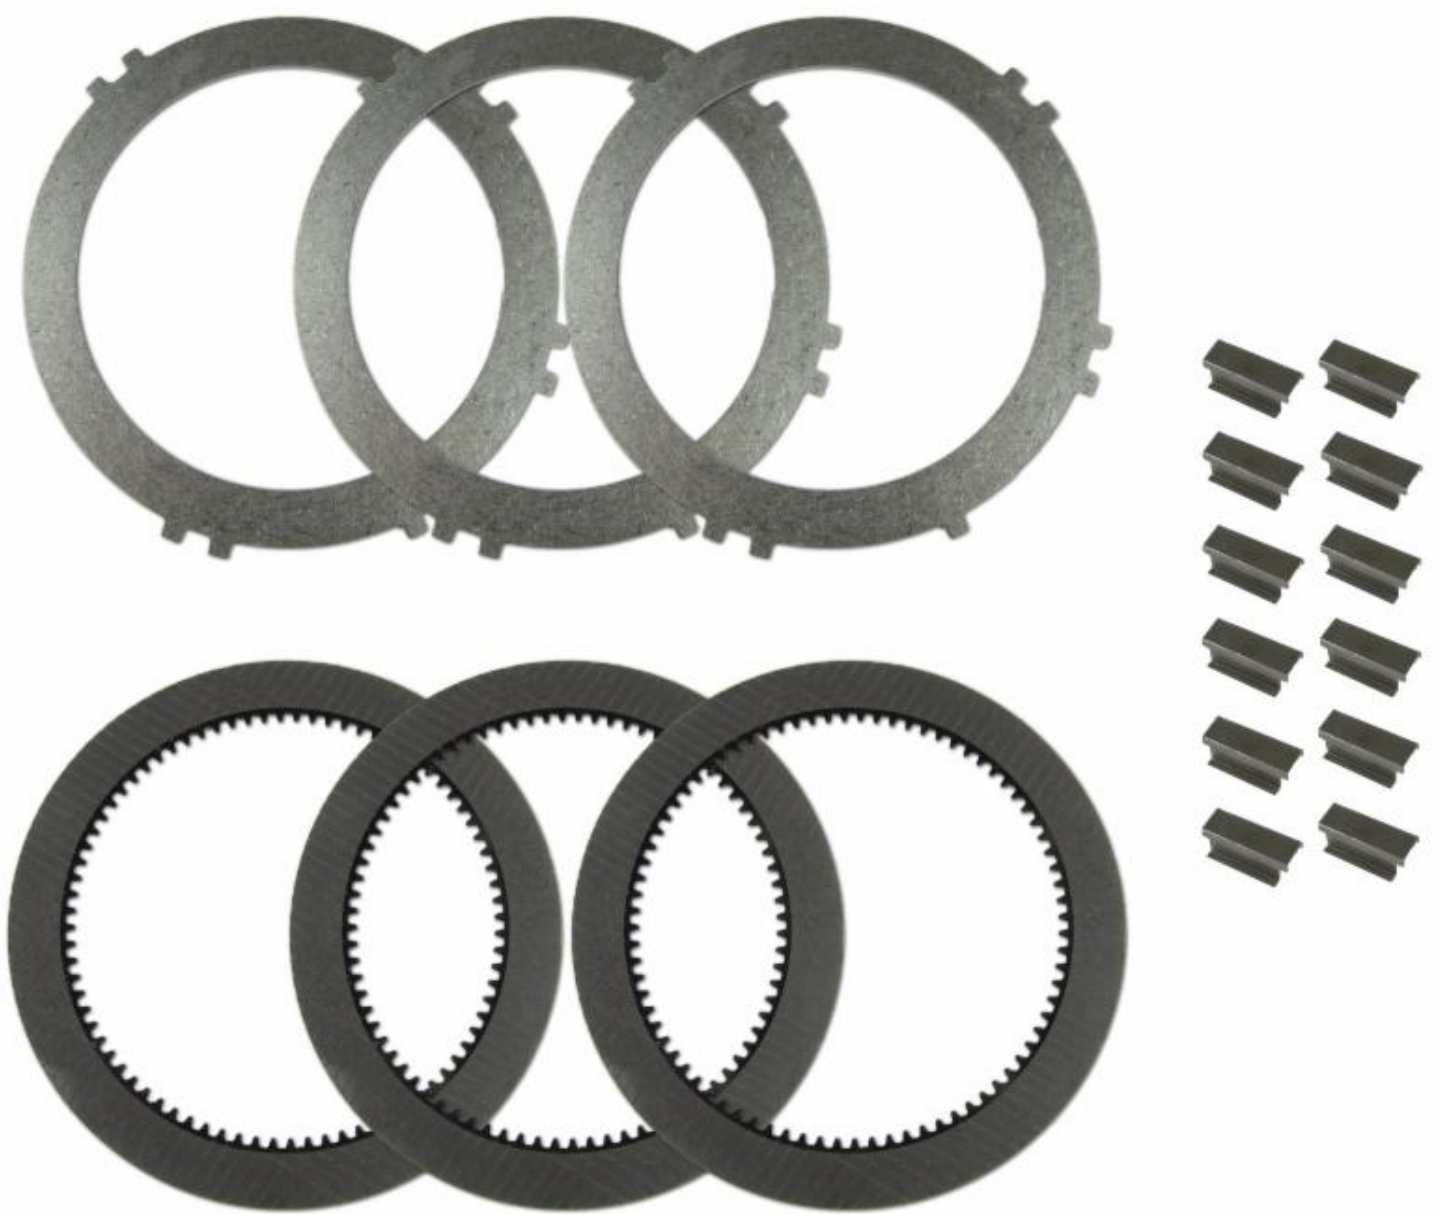

CaseSaver Clutch Kit for ALLISON AT540/545 1970-On Original Alto Aftermarket

This Alto Kit # 055758 contains the following:

Specially Designed Alto Clutch Plates (3 Friction, 3 Steel)
12 CaseSaver Steel Clips

This is a "Case Saver" PowerPack for Allison AT540/545 transmissions. The 3rd gear steel clutch plates spline into the aluminum case of the transmission and over time can damage the transmission housing to the point that it must be replaced. The Alto Case Saver PowerPack Clutch Kit solves this problem by providing a reinforced steel surface that fits into the damaged case area. This will eliminate the need to purchase an expensive replacement case.

NOTE: THIS CASE SAVER CAN BE USED DURING A REGULAR OVERHAUL TO GUARD AGAINST THIRD CLUTCH CASE DAMAGE.
