Conflict-Free Mineral Supply Policy

Alto shares worldwide concern that metals mined in conflict areas of the Democratic Republic of the Congo (DRC) and its adjoining countries of Rwanda, Burundi, Tanzania, Congo Republic, Angola, Sudan, Central African Republic, Zambia and Uganda may be making their way into the automotive supply chain, fueling human rights violations and environmental degradation.

Alto works to achieve a DRC Conflict-Free supply chain by supporting industry-wide efforts to implement due diligence in standards, systems and procedures. In addition to requiring that our suppliers comply with applicable laws, we expect that they source materials from environmentally and socially responsible suppliers and be DRC Conflict-Free.

Alto is committed to supporting our customers' requirements with reference to the Conflict Mineral Law and all other programs concerned with protecting both the global population and the environment.

Alto Products Corp. complies with the Conflict Mineral Law
